## **DETAILED ACTION**

### ***Priority***

1. Applicant's claim for the benefit of a prior-filed application under 35 U.S.C. 119(e) or under 35 U.S.C. 120, 121, or 365(c) is acknowledged. However, data provided by applicant is not consistent with PTO records. Verification and correction is required.

### ***Drawings***

2. The drawings are objected to because in Fig. 5, there are two "No" conditions from step 520. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

***Allowable Subject Matter***

3. The following is a statement of reasons for the indication of allowable subject matter:  
prior art of record fails to teach, or renders obvious, alone or in combination, a method of routing calls in a communication system in which a call is received from an originating network in the communication system, an identity of the originating network is determined so that the call is routed in the communication system based on the identity of the originating network.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Shaffer et al. (U.S. Patent No. 5,848,131) teach an automatic information and routing system for telephonic services. Scherer (U.S. Patent No. 5,867,562) teaches a call processing system with call screening. Ward (U.S. Patent No. 6,654,451) teaches methods and systems for billing and routing local toll-free calls. Antonucci et al. (U.S. Patent Application Publication No. 2001/0028711) teach a system and method for accessing personal information relating to a caller in a remote telecommunication network.
